Yusif Alabed

Jumeirah Golf Estates, Lime Tree Valley, Villa B-09, Dubai, UAE ▪ +971 52 926 0792 ▪ yusif_alabed@icloud.com

PROFILE AND OBJECTIVE

I'm an aspiring electrical engineer with a passion for researching impactful health and well-being solutions. Beyond the classroom, I've undertaken experiences in healthcare machine learning, hackathons, and engineering competitions. I'm also an avid basketball player, prefect, and community volunteer.

EDUCATION

Dubai College (DC), Dubai, UAE *2020 - Present*

- A-levels: Maths, Further Maths, Physics, and Computer Science
- GCSEs: Achieved all 9s in Mathematics, Further Mathematics, Physics, Chemistry, Biology, English Language, English Literature, Arabic, Design & Technology, Geography, Computer Science, HPQ (Distinction A*)
- HPQ: Studied the feasibility of applying artificial intelligence in agricultural farming in Jordan; wrote 13-page dissertation, included AI case studies and highlighted Jordan's limitations
- EPQ: *The extent to which the development of fully autonomous surgical robots will be achievable over the next two decades*
- CS Non-Exam Assessment: Built 'Scholar Seas', an educational pirate-themed video game designed using the Python library Pygame integrated into a website using Flask

Imperial Global Summer School in Engineering, Imperial College London, London, UK *Aug 2025*

- Attended lectures by Imperial professors; participated in bridge designing & motor building projects
- Competed in a team enterprise competition; ideated and presented an electrically stimulating cast

Online Courses *2025 - Present*

- Grade 12 Chemistry (SCH4U), Ontario Secondary School Diploma (OSSD) Online Course (2026)
- Harvard Online course, *CS50: Introduction to Computer Science* (2026)
- Product Design Online's YouTube course, *Fusion in 30 Days* (2025)
- Autodesk Fusion course, *Introduction to Fusion* (2024)

WORK EXPERIENCE & RESEARCH

Metabolic.Health, Dubai, UAE, *Research Intern - 3 months* *Dec 2024 - Jan 2025 & Jul 2026 - Present*

Specializes in tech-driven medical treatments for weight-loss, diabetes, hormonal imbalances and overall health

- Observed diabetes and obesity consultations, gaining exposure to body composition analysis and thyroid scans
- Explored wearable health technologies, including Oura Ring and Continuous Glucose Monitor sensors
- Co-authored 2 research papers with Research Department about metabolic biomarkers; gamified patient results on the Metabolic.Health portal for comprehension; investigated endocrine disease patients quality of treatment such as RetiCKD, CGM Glucose monitors, Whoops (under review for publication in Springer Nature)

Unified Biomarker Research, Dubai, UAE, *Student Researcher* *Mar 2026*

- Developed biomarker to predict and tackle renal disease and heart failure
- Qualified for the Dubai Science and Engineering Fair 2026, a UAE Ministry of Education-sponsored science fair

Machine Learning (ML) For End-Stage Renal Disease Diagnosis, Dubai, UAE, *Online Researcher* *Jun 2025- Feb 2026*

- Worked under mentorship of David Nguyen, UC Berkeley alumni and founder of NextLevelPrep
- Created ML model analyzing patient clinical and metabolic data to diagnose end-stage renal disease
- Wrote 4,500 word research paper, currently in the second stage of peer review for NHSJS

McLaren, Dubai, UAE, *Intern - 2 weeks* *Dec 2025*

- Assisted technicians with vehicle inspections, system checks, and pre-delivery preparations on performance vehicles; operated diagnostic software and onboard systems
- Supported workshop by managing tools, parts logistics, and service documentation through portals
- Performed hands-on maintenance: ensuring correct torque, fluid levels, and part fitment within standards
- Prepared vehicles for final inspection and quality control before customer delivery

LEADERSHIP AND ACTIVITIES

FIRST Global Challenge UAE Robotics, Dubai, UAE, *National Winner & UAE Team Member* *June - Oct 2026*

Olympics-style international robotics competition for high school students

- Designed and built a competition robot as part of Team Pyros and developed a New Technology Experience project proposing a technological solution to tackle wildfires
- Won the Sheikh Zayed Award: first place at the UAE national competition
- Selected to join the official UAE team competing internationally in Korea; unable to join the traveling squad due to A-level commitments

DC Student Leadership Team, Dubai, UAE, *Prefect* *Mar 2026 - Present*

- Elected to the student leadership team from school-wide election campaign
- Helped voice student opinions and make decisions on designing a new Sixth-Form center and humanities block

ADNOC Land Rover 4x4 Challenge, Abu Dhabi, UAE, *Electrical Engineer* *Oct 2025 - Jun 2026*
Youth STEM competition to design, build, code, and test an off-road 4x4 vehicles

- Placed 2nd in Professional Category; designed and programmed autonomous 4x4 ATV to navigate three obstacle courses
- Applied mechanical engineering, coding, and robotics, improving vehicle stability and suspension; CAD and Arduino systems
- Rewired circuits to convert 4x4 remote into functional controller; collaborated with team to design, construct
- Contacted IPs to fund electronic components and team merchandise

InnovAIte Hackathon,Dubai, UAE (1week) *Jan 2026*
UAE's largest student-led AI competition

- Designed and built a prototype for LastBite, an AI-powered platform that tracks food expiry dates to generate waste-reducing recipe recommendations
- Applied machine learning and rule-based decision systems prioritizing recipes based on urgency, nutritional value, and ingredient availability
- Collaborated with team to pitch to industry mentors; placed as 1 of 8 finalists among 25+ competing UAE teams

DC Engineering Society, Dubai, UAE, *Leader* *Jan 2025 - Jun 2026*

- Led engineering workshops and technical sessions on robotics, electronics, and schematic design
- Coordinated student projects for classrooms of 20-30 kids at a time, guiding design, prototyping and testing
- Helped organize industry speaker events to connect members with real-world pathways
- Authored 2 articles for Engineering Society magazine, DC Hydraulics, on emerging technologies such as swarm robotics for space exploration and targeted drug delivery and medical robotics for assisted surgery

DC Varsity Basketball, Dubai, UAE, *Captain* *Sept 2025 - Present*

- Captained U19 team, giving motivational pep-talks to my team and younger DC teams
- Train weekly and participate in competitions against other Dubai schools
- Represented school in the World School Games in Valencia, Spain (Nov 2025)

DC Heyerdahl House, Dubai, UAE, *House Captain* *Sept 2024 - July 2025*

- Organized and supervised Heyerdahl House events such as sports day; helped raise school spirit through assemblies

DC Computer Hardware Society, Dubai, UAE, *Member* *Sept 2024 - May 2025*

- Learned soldering skills; used code to operate machinery; programmed Raspberry Pis to handle LEDs & circuits

COMMUNITY SERVICE

CircuitCraft, Dubai, UAE, *Founder* *Jan 2026 - Present*

- Designed and built engineering kits using 3D printing and CAD technology for children to build their own sine wave breathing lights that act as a visual guide to regulate breathing and manage anxiety
- Led STEM workshops in Dubai schools, delivering sessions to under-resourced communities in the Middle East; sessions in Jordan planned for December 2026
- Managed kit distribution, session planning, and volunteer coordination across multiple locations

DC MUGA Basketball League + Charity Organization, Dubai, UAE, *Lead Organizer* *Oct 2025 - Present*

- Coordinated charity matches to support building schools in Nepal; raised USD $13,600

Touch Dubai, Dubai, UAE, *Volunteer* *Sept 2023 - Present*
An organization providing inclusive fitness programs for special needs children to build strength and confidence

- Supported people with disabilities in weekly sports sessions at CrossFit Alioth gym
- Worked with all age groups to increase strength and wellbeing

AWARDS

- **FGC UAE Nationalist** (out of 12 teams, 80+ participants), Sheikh Zayed Award, *2026*
- **Second Place Overall**, ADNOC Land Rover 4x4 Yas in Schools (out of 25+ teams), *2026*
- **Finalist**, Dubai Science and Engineering Fair **(**biomarker research qualified to present in finals, *2026*
- **Finalist**, InnovAIte AI Hackathon (1/8 finalists out of 25+ teams), *2026*
- **Bronze,** *2024*, **Silver**, *2025*, **Gold**, *Expected 2027*, Duke of Edinburgh
- **1st in Senior 5 & Finalist (**scored 28+ points/4 competitions), American Computer Science League, *2025, 2026*
- **Senior Gold**, *2025*,Intermediate Challenge Gold, *2023*, United Kingdom Mathematics Trust
- **Distinction** (top 25%) **and School Champion**, Waterloo Math Cayley contest, *2025*
- **High Achievers Award** (grade 8 in 5+ GCSEs), **Pearson Edexcel**, *2025*
- **Distinction** (top 25%), Bebras Challenge in Computational Thinking, *2024*

SKILLS

Languages: Fluent in English and Arabic
Computer: Python (Intermediate), Fusion 360, JavaScript, Flask, HTML, Pygame, Bambu studio
Piano: Associated Board of The Royal School of Music, Grade 6
Sports: Basketball 8 years, Soccer 10 years (DC JV, City FC), Competitive Skiing 6 years, Golf 8 years (Tommy Fleetwood Academy, Dubai)
